Hapro
—carriers—

Strength and reliability.

**FREE
TIME.**

*...so you'll be taking the bikes
along too!*

HAPRO CARRIERS, YOUR PERFECT PACK MULE.

Your car is not a stubborn beast of burden.

The cleverly designed Hapro Atlas and Hapro Strada bicycle carriers will carry your entire family's bikes with pleasure. And with the Hapro Giro your car will shoulder your bikes without complaint. So you can take along everything you need in the best way possible. Safely, quickly and easily mounted and securely locked in place, for years of travel pleasure.

HAPRO ATLAS, HIT THE ROAD WITH EASE.

Powerhouse with a friendly nod.

The Hapro Atlas is a very cleverly designed, exceptionally compact and attractive looking bicycle carrier for the back of your car. Strong, safe and covered by a three-year warranty, the Hapro Atlas is the reliable partner for adventurous excursions. Attaching and securing this elegantly designed bicycle carrier couldn't be simpler: thanks to the quick mounting system, rock-solid attachment to any common towing hook is accomplished with just a flick of the wrist.

CARRYING... POWER! Carry electric bikes? With ease! The Hapro Atlas 2 Premium E-bike does it. Thanks to the sturdy construction it has a greater carrying capacity, and the additional distance between the wheel holders provides sufficient room for two electric bicycles with a battery or even a central motor.

Quick mounting system:

The Hapro Atlas provides quick, rock-solid attachment to any common towing hook. What's more, this bicycle carrier is designed for easy tilting, even with bicycles in place. So you can access the boot without any need to remove the bikes.

**Wheel holders:**

The adjustable wheel holders slide easily, so the bicycle wheels can be positioned perfectly before being secured in place with the quick-fit clasps.

**Frame holders:**

The frame holders can be easily repositioned for the perfect fit and provide optimum stability. The soft protective layer on the inside prevents sliding and damage to the bicycle frame. Each of the frame holders has a separate lock.

**Theft prevention:**

To prevent theft, the lock on the towing hook mounting system ensures that the bicycle carrier cannot be detached without a key.

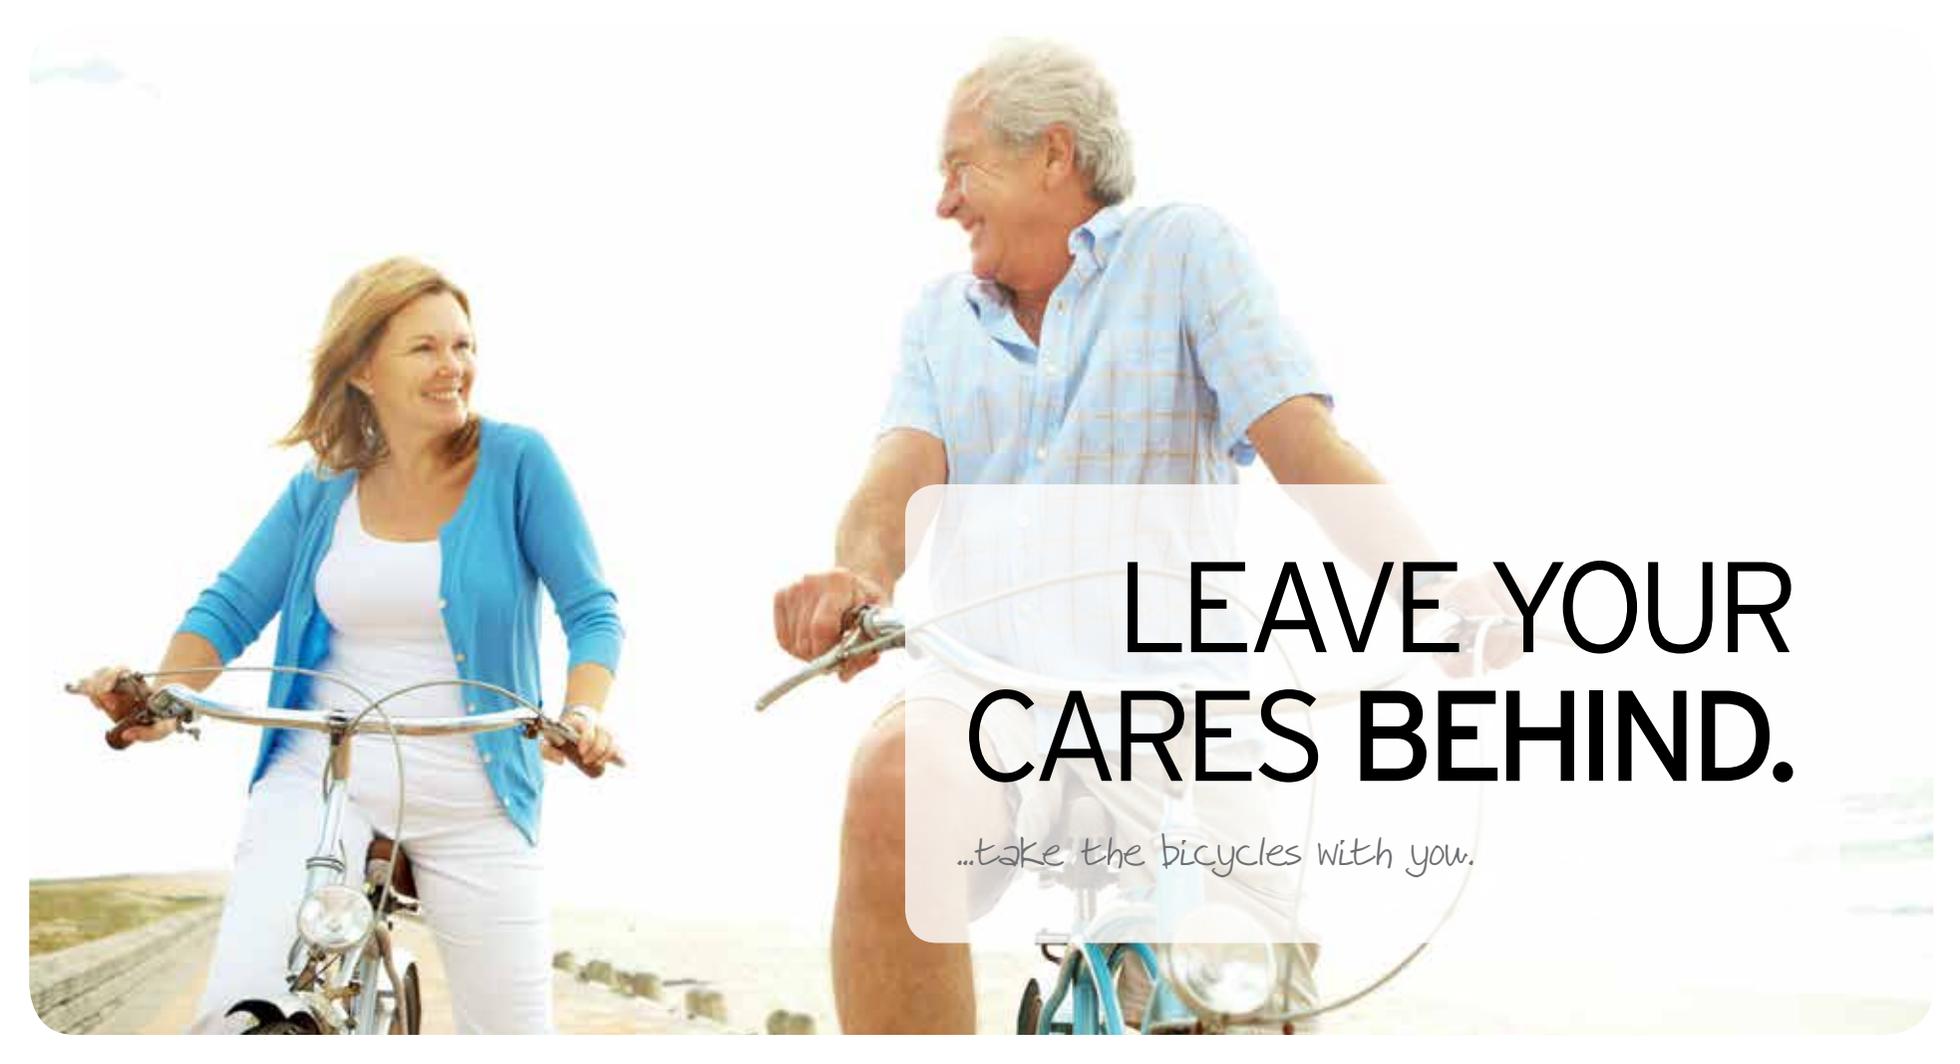

**Light units:**

The two Premium versions are equipped with fold-away light units. This allows the number plate to be easily slid in and protects the lamps while in storage.

SOPHISTICATED CARRYING SYSTEM

The Hapro Atlas is designed to be tilted, so you can access the rear hatch without having to remove the bicycles. With the Hapro Atlas you can easily take along one, two or three bikes. The two Premium versions, one of which is also suitable for e-bikes, are equipped with fold-away light units. This allows the number plate to be easily slid in and protects the lamps during storage.

A man and a woman are riding bicycles on a paved path. The woman is on the left, wearing a blue cardigan over a white top and white pants. The man is on the right, wearing a light blue plaid shirt and white shorts. They are both smiling and looking towards each other. The background is a bright, open landscape with a clear sky.

**LEAVE YOUR
CARES BEHIND.**

...take the bicycles with you.
